Overview

A meaningful, human connection with a teacher is an invaluable benefit to a child. We believe mentors are a necessary attribute of the traditional school model that homeschoolers can greatly benefit from. The Tycoons class (grades 1–2) dives into Literacy Essentials building a strong foundation necessary for developing reading and writing skills. Throughout a 3 hour period, 3 days a week, students receive in person instruction using structured curricula that covers all common subjects and highlights America's founding principles. In a positive and social environment, the ASA model emphasizes self-governance, critical thinking and entrepreneurship. With day to day consistency and rhythm, your child will benefit from a well rounded routine created with exceptional educational activities and quality arts & crafts. Designed for homeschooling families, this program balances learning and living, inspiring children for a lifelong love of discovery.

Safety

Parents feel at ease knowing their children's safety is our first priority using background checks for all volunteers and highly trained armed guards to monitor the location at all times. Complete with cameras both inside and out, ASA works with companies that come fully insured and equipped. Each family has a unique code to access the locked building and can freely check on their child as they feel necessary.

Letter from the Founders

Dear Fellow Parent,

Choosing to homeschool our own children gave us more time to spend together and an opportunity to shape their education according to our standards. We found the perfect academic components in the Classical model of education, which we believe offers the surest, time-tested and most complete schooling when paired with in-home learning. American Seekers Academy is a reflection of family-centric principles and our admiration of Hillsdale Academy and their Barney Initiative. With this example in mind, ASA was designed by homeschool parents like yourselves, people who appreciate certain aspects of traditional schooling and also deeply value the opportunity to be at home with their children. We wanted to meet more parents who are proudly raising their children according to their beliefs and whose hope is the same as ours, to protect the liberties of our children. Ultimately, we needed more than the average co-op could provide. We found out that we weren't the only ones.

Thank you for the chance to raise our family alongside yours.

-The Browns (homeschooling since 2020)

NOTES

Incorporate Socratic Discussion with Stories

A growing ability to use language with power and grace is one of the surest marks of educated men and women and one of the surest safeguards against the loss of liberty.
